OUR SERVICES

Fire Alarm

We design, supply & install all types of fire alarms systems.

Fire Fighting

Range of fire protection system at lowest cost in UAE

Exit Lights

Ensure safe passage way by installing emergency exit lights

Maintenance

Let our team of expertise help you in maintaining your systems

Extinguisher

All types of fire extinguisher, supply, service & refilling

Supply & Install

We supply all types of UAE approved fire safety products

Design & Services

Leave the design work on our expert hands to fulfil your needs

Fire Approvals

Get the essentially required civil defense approvals at finger tips

FIRE

ALARM

Fire alarm servicing is the best way of knowing that you can actually rely on your detection system when you need it most as it can save lives and reduce fire damage. Regular servicing is essential, and generally required every three months, in order to fully comply with fire safety regulation and legislation. Once ordered, one of our trained engineers will shortly be in contact with you to arrange a suitable day and time to attend.

FIRE

FIGHTING

DNIEPER-FIRE is a Civil Defense approved and certified company excel in providing the Firefighting systems installation, testing, maintenance, certification, approvals and various services in and around Abu Dhabi & Al Ain region.

Our team comprises the best and qualified professionals who ensure that all your life-saving equipment installed by us are optimally maintained. They ensure proper maintenance and work towards making products perform when they are most needed.

EXIT

LIGHTS

DFS SUPPLY, INSTALL & MAINTAIN EXIT & EMERGENCY SIGNAGE & LIGHTS

Always open but safely closed - the demands on escape and rescue routes are extensive, and initially seem contradictory. They need to save lives in the event of danger, and prevent access by unauthorised persons on an everyday basis. Intelligent emergency exit system solutions are the perfect solution for this apparent contradiction.

MAINTENANCE

Having problems with your existing fire fighting and fire alarm systems?

Worry not! We could be of help by serving you with an Annual Maintenance Contract (AMC). You could avail our services 24/7 for an AMC with the assurance of quick response and responsibility. As a part of the AMC, we take over your existing system and closely monitor all crucial elements including Fire fighting, Fire alarm, Emergency Lighting, Voice Evacuation and Gas suppression system. As part of the AMC, we also help our clients with the necessary documents, clearances and periodic certifications that are required to install and maintain their fire fighting systems.

EXTINGUISHER

A fire extinguisher is designed to put off small fires under control. It is used on the fire directly, and works by spraying an anti-combustion agent onto the base of the fire. In many countries, it is compulsory for large buildings to have fire extinguishers fixed at different locations, so that people nearby can grab a unit and try to control the fire on their own.

As reputed fire extinguisher suppliers in the UAE, our units come in a variety of sizes, with different kinds of powerful anti-fire fillings, making them perfect for use commercially & domestically.

SUPPLY & INSTALL

We supply complete range of Fire Protection System including fire alarm, emergency exits, firefighting, gas system and all types of fire extinguisher at competitive rate price and delivery across UAE.

DESIGN & SERVICES

We serve on many commercial facilities throughout the UAE All Emirates. High-rise Building, stadiums and power plants are just a few of our everyday projects. We work with our clients from the design phase through installation to ensure a properly working fire system.

As a Fire Protection Company we work in everything from high rise buildings to stadiums to power plants. Why then would you trust anyone else to protect your family, home and property? You get one chance to install a life-saving fire protection system and you deserve the best. Started with design to installation we will be with you the entire way to ensure your residential fire protection system is there when you need it.

FIRE

APPROVALS

At DFS, we are producing life-saving devices with passion and precision. We are the best equipped to maintain them. This is why the law dictates that all must be serviced and maintained only by authorized personnel.

DFS AMC Package

DFS technical team is a group of skilled, trained engineers & technicians who undertake a Quarterly Service Schedule for AMC customers to ensure that every equipment in the client's premises is always working optimally.

FM200

A CLEAN AGENT

Dnieper Fire Safety, Clean Agent Fire Extinguishing Systems are engineered systems, meaning they offer maximum flexibility to tailor each system design according to the location they protect.

At DNIEPER FIRE, we equip people with the right tools to put out fires before they pose bigger risks. We provide a broad range of fire-fighting equipment, including a top-rated FM 200 suppression system: Fire Suppress 227.

FOAM

SYSTEM

Foam suppression systems extinguish fire by separating the fuel from the oxygen. In more technical terms, these systems are used to “cool the fire and coat the fuel that the fire is consuming to prevent contact with oxygen and reduce combustion ability.”

To do this, the extinguishing agent (the foam) smothers or blankets the surface of the fuel. The water content of the foam then cools the fuel and the area of foam covering the fuel to prevent reignition via flammable vapors.

An imperative source for fighting fires at any level of your house, business & plants. Effective method of extinguishing the fire within fraction of seconds

WATER

SPRINKLER

A sprinkler system is designed to use water to put out a fire. Between a fire suppression system and a traditional sprinkler system we have your residential, commercial building and industrial. There are four different types as follows:

- **Wet pipe systems:** typical application, with water in the system's pipes ready to be activated by the opening of fire sprinkler heads due to heat.
- **Dry pipe systems:** this system has air or nitrogen gas in the pipes and water is released into the pipes upon activation of the sprinkler heads after a slight delay.
- **Deluge:** activated by smoke or heat detectors, deluge equipment releases a dousing flood of water or foam in an instant through an open-sprinkler, nozzle, or foam generator, utilizing an unpressurized piping system.
- **Pre-Action:** This is a combination of wet and dry pipe fire sprinkler systems and are not activated until a fire is detected.

SUPPRESSION SYSTEM

A fire suppression system will have built-in components to detect fires as early as possible. These components will first identify the presence of flames and smoke. The suppression system will then initiate an alarm, so the blaze can be subdued before it has the chance to spread. A fire suppression system can be considered an 'active' fire protection method because the system is triggered in response to the presence of fire. As will be explored further in this article, a fire suppression system also contains a range of components that 'actively' work to extinguish flames and smoke.

HYDRANTS

A Fire water hydrant system consists of a piping, distributed all around a facility with a high pressure pumping system, for the purpose to provide abundant and frequent water to firefighting.

- The water main is provided with a branch or T-piece to which the hydrant is attached either directly or a short length of pipe inserted.
- The hydrant is situated in a chamber or pit of bricks work or other suitable material which is covered with a hinged lid, usually of cast iron.

ADVANCE

FIRE ALARM

An alarm is one of the most imperative pieces of equipment that we think of when installing fire safety systems in any place. We've all seen it! It is mostly like a small or a big red panel which has a push button with a keyed door.

No other equipment matters as much as a fire alarm. It is the first point of call that is used to alert people around in case of a blaze. At Dnieper Fire and Safety, we know what it means to install a fire alarm system and that is why we provide the most advanced, intelligent and compatible fire alarm system.

Our systems are equipped to help you raise an alarm at the right time so that you do not have to incur damages.

Dnieper Fire and Safety can definitely be counted among the top 10 fire alarm system in Abu Dhabi, Sharjah, Al Ain and Dubai.

HOSE

REELS

DFS Hose reel cabinets are designed to accommodate fire hose reel, fire fighting equipment and breaching inlet. Fire hose reel cabinets are manufactured to comply with BSEN 671-1 standard and breaching inlet cabinets are manufactured to comply to BS 5041-5 standard.

- Stainless steel
- Powder coated
- Various Sizes

FM APPROVED **UI LISTED** FIRE PUMPS

Water Pumps

Suitable for all types of projects, building and offices to connect with Fire hose reels, Hydrants, Sprinklers and water based fire protection systems. Comes with 2 years standard warranty and UL / FM mark.

Foam & Clean Agent System Pumps

Foam based fire protection systems comes with bladder tank which create foam mist discharge suitable for Electrical, mechanical assets protection.

High Capacity Pumps

Our high value pressure rating pumps comes with best quality & durability to withstand for fire protection Offshore & high-rise towers in across UAE. Split-case and Vertical pumps are essential to protect major infrastructures.

VOICE

EVACUATION SYSTEM

DFS designs and provides certified voice evacuation systems to meet the needs of your building in UAE and the Middle East. Our systems will alert all of the building's inhabitants that they must evacuate. This is one of the most effective methods available in the event of an emergency.
